| CERTIFICATE OF TRANSMISSION BY FACSIMILE (37 CFR 1.8) Applicant(s): Joseph Vinetz  |                             |                       | Docket No.<br>026.00101 |
|--|-----------------------------|-----------------------|-------------------------|
| Serial No.<br>09/5 <b>7</b> 9,383  | Filing Date<br>May 26, 2000 | Examiner<br>P. Baskar | Group Art Unit<br>1645  |
| Invention:  RECEIVED CENTRAL FAX CENTER  |                             |                       |                         |
| JUN 0 3 2004  OFFICIAL  I hereby certify that this Supplemental Amendment Under 37 CFR 1.116 (3 pgs)                                     |                             |                       |                         |
| (Identify type of correspondence) is being facsimile transmitted to the United States Patent and Trademark Office (Fax. No. 703 872-9306 |                             |                       |                         |
|  |                             |                       |                         |
| on June 3, 2004 (Date)   |                             |                       |                         |
| (177484)   |                             |                       |                         |
|  |                             |                       |                         |
| Karla M. Weyand  (Typed or Printed Name of Person Signing Certificate)   |                             |                       |                         |
| Kar O. M. W.   |                             |                       |                         |
| (Signature)  |                             |                       |                         |
|  |                             |                       |                         |
|  |                             |                       |                         |
|  |                             |                       |                         |
|  |                             |                       |                         |
| Note: Each paper must have its own certificate of mailing.   |                             |                       |                         |
|  |                             |                       |                         |
|  |                             |                       |                         |
|  |                             |                       |                         |
|  |                             |                       |                         |
|  |                             |                       |                         |
|  |                             |                       |                         |
|  |                             |                       |                         |
|  |                             |                       |                         |
|  |                             |                       |                         |
|  |                             |                       |                         |
|  |                             |                       |                         |
|  |                             |                       |                         |

## 1. (Canceled)

- 2. (Currently Amended) The isolated nucleic acid molecule of claim  $\pm$  4 wherein said nucleic acid is deoxyribonucleic acid.
- 3. (Original) The isolated nucleic acid molecule of claim 2 wherein said deoxyribonucleic acid is cDNA.
- 4. (Currently Amended) An The isolated and purified nucleic acid molecule of claim 1 as set forth in SEQ ID NO:1.
- 5. (Currently Amended) The isolated nucleic acid molecule of claim 1 4 wherein said nucleic acid molecule encodes the an amino acid sequence as shown in SEQ ID NO:3.
- 6. (Currently Amended) The isolated nucleic acid molecule of claim  $\pm \ \underline{4}$  wherein said nucleic acid is ribonucleic acid.
- 7. (Original) The isolated nucleic acid molecule of claim 6 wherein said ribonucleic acid is mRNA.

## 8.-9. Canceled

- 10. (Currently amended) An expression vector comprising the oligonucleotide nucleic acid molecule of claim  $4 \ \theta$ .
- 11. (Original) The expression vector of claim 10 wherein the expression vector is selected from the group consisting of a plasmid and a virus.
